

1.)

```
#include<stdio.h>
int main (){
    int score,grade;
    printf("Enter your grade:");
    scanf("%d", &score);
    if(score < 50)
        grade ="F";
    else if(score >=50 && score < 60)
        grade ="D";
    else if(score >=60 && score < 70)
        grade ="C";
    else if(score >=70 && score < 80)
        grade ="B";
    else
        grade ="A";
    printf("The grade is:%s", grade);
    return 0;
}
```

2.)

```
#include <stdio.h>
int main0{
    int num1,num2,menu;
    printf("Enter num is:");
    scanf("%d", &num1);
    printf("Enter num is:");
    scanf("%d", &num2);
    printf("\nnum1:%d num2:%d",num1,num2);
    printf("\n*****Selrct Funcion (number)*****");
    printf("\n 1.Plus\n 2.minus\n 3.multiply\n");
    scanf("%d", &menu);
    switch(menu){
        case1 :
            printf("\nYour select Plus function\nThe results of %d +%d
is:%d",num1,num2,num1+num2);
            break;
        case2 :
            printf("\nYour select Mins function\nThe results of %d -%d
is:%d",num1,num2,num1-num2);
            break;
        case3 :
            printf("\nuYour select Multiply function\nThe results of %d
x %d is:%d",num1,num2,num1*num2);
            break;
    }
    return 0;
}
```
